# SDK Tutorial

Welcome to App42 Cloud API, one stop shop for complete Backend as a Service (BaaS) solution for App developers!

Here are the steps to help you get started with your JavaScript SDK to be integrated with your App.

1. Go To <http://api.shephertz.com>.
2. Click on **Get Started** button.

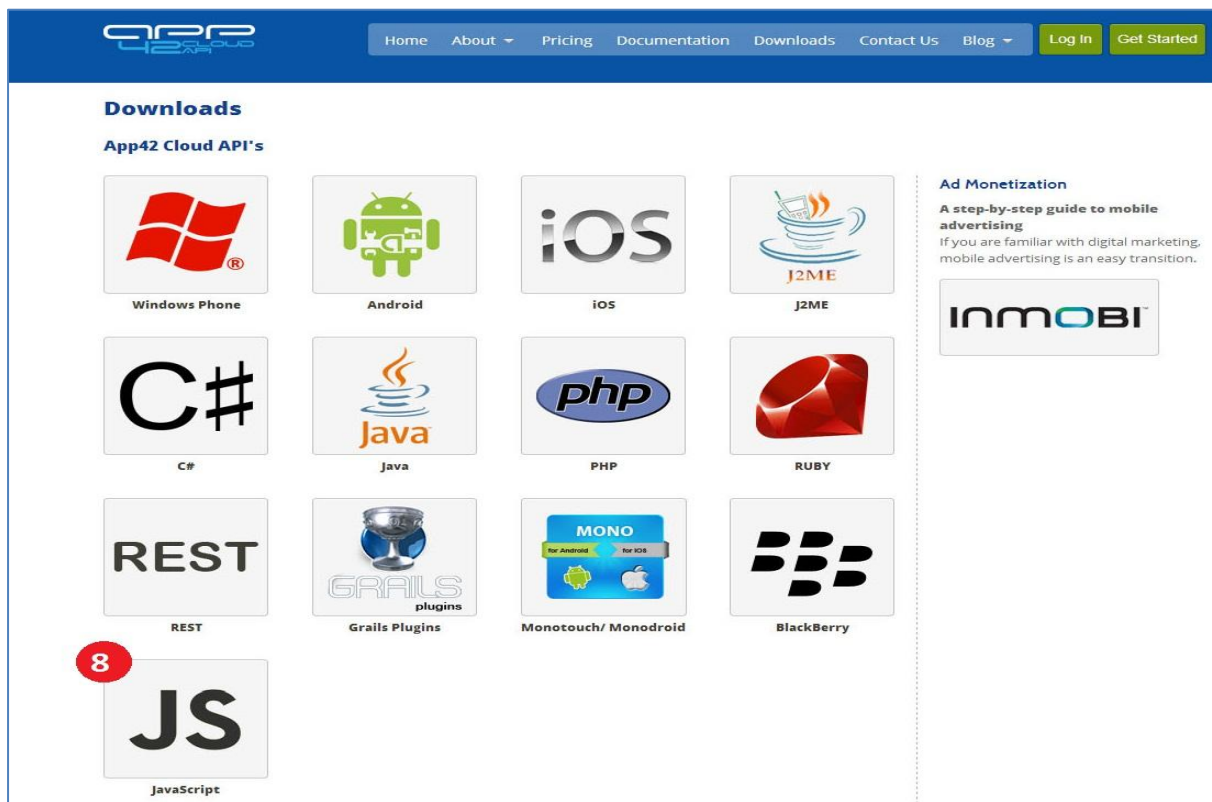

3. **Login with Github** account.  
OR
4. Create your App42 account by providing us your contact information. It just takes few seconds.
5. Enter your details and click **Register** button.

6. On successful registration, a demo App will be created and apiKey and secretKey for the same will be generated. Intention of demo App is to make user experience seamless to use the APIs.
7. Click the [Download here](#) link.

8. From [Downloads](#), select the [JavaScript](#) icon to download the SDK.

## 9. Click on **Download** button.

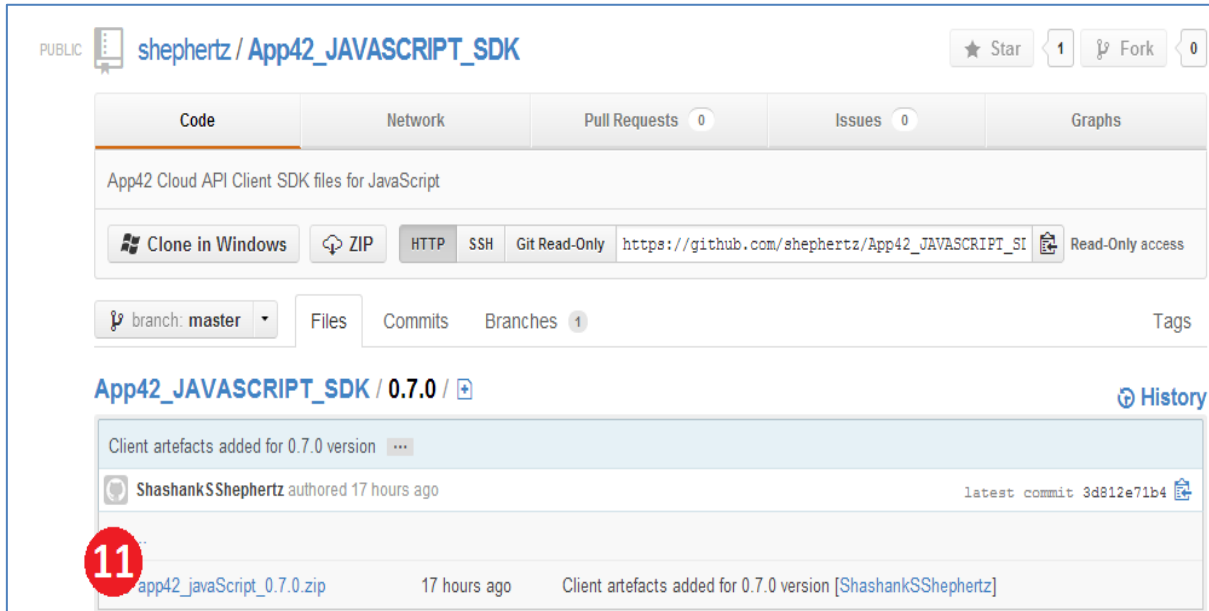

The screenshot shows the App42 website's JavaScript SDK page. The navigation bar includes links for Home, About, Pricing, Documentation, Downloads, Contact Us, and Blog, along with 'Log In' and 'Get Started' buttons. The main content area features a large 'JS' logo, a description of the SDK, and a list of useful links. A red circle with the number '9' is placed over the green 'Download' button.

## 10. Select the version of JavaScript SDK to download.

The screenshot shows the GitHub repository page for 'shephertz / App42\_JAVASCRIPT\_SDK'. The page displays repository statistics, cloning options, and a list of commits. A red circle with the number '10' highlights the commit for version 0.7.0, which was authored 17 hours ago.

Commit Hash	Author	Time Ago	Description
3d812e71b4	ShashankSShephertz	17 hours ago	Client artefacts added for 0.7.0 version [ShashankSShephertz]
	ShashankSShephertz	25 days ago	Add js file and sample app. [ShashankSShephertz]
	ShashankSShephertz	25 days ago	Add js file and sample app. [ShashankSShephertz]
	ShashankSShephertz	24 days ago	url change. [ShashankSShephertz]
	NaveenGShephertz	6 months ago	Initial commit [NaveenGShephertz]
	ShashankSShephertz	24 days ago	Add sample page. [ShashankSShephertz]
	ShashankSShephertz	24 days ago	Add Sample Page. [ShashankSShephertz]

11. Save the SDK zip file and unzip on your local system. Unzip file will contain sample folder which can be referred for detailed usage of SDK.

12. To integrate JavaScript SDK with your project:

- i. Include `App42-all-x.x.x.min.js` in your project.
- ii. Include the following script statement in your project:

```
<script type="text/javascript" src="App42-all-0.6.0.min.js"></script>
```

- iii. Find the sample code and initialize `apiKey` and `secretKey` as mentioned below:

```
App42.initialize("API KEY","SECRET KEY");

var user = new App42User();
var userName = "Nick";
var pwd = "*****";
var email = "nick@gmail.com";
var result ;
    user.createUser(userName, pwd, email,{
        success: function(object) {
            test( "createUser", function() {
                var userObj = JSON.parse(object);
                result = userObj.app42.response.success;
                console.log(result)
            });
        },
        error: function(error) {

        }
    });
```

- iv. Save and run.

Log in to [App42 Management Console- AppHQ](#) to manage your Apps.

Refer to our [Documentation](#) for other language specific Quick Guides.
